

Perfected GuardsPro Client Web Portal

Boost Client Satisfaction

GuardsPro Client Web Portal is designed to streamline the report sharing process with the clients, giving them access at multiple levels, simultaneously, allowing them to securely log in to multiple devices at once. It truly organizes data to easily access it on the go.

Custom Access

GuardsPro gives you full control over the information by providing limited or unlimited access to your clients using the Client Web Portal.

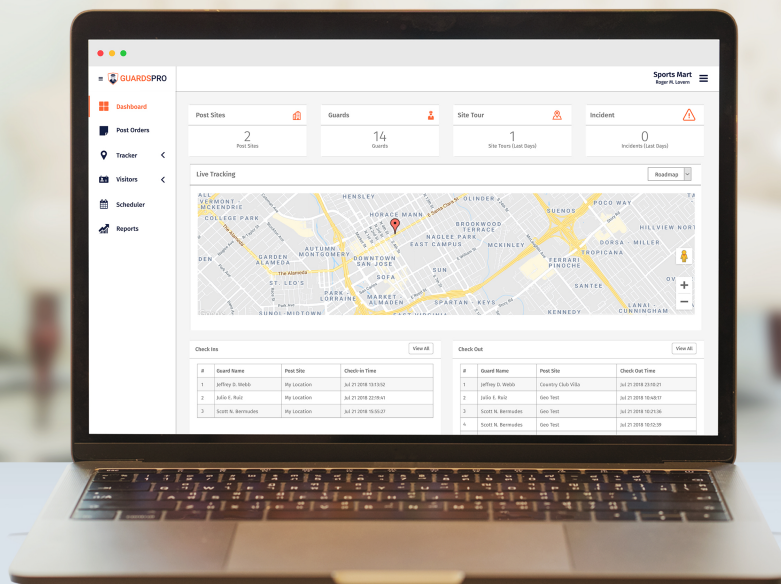

User Management

GuardsPro guard tour Client Web Portal easily allows the clients to give access to multiple users to their Client Web Portal as well as manage them on their end.

Effortless Reporting

Guard tour reporting module lets your clients access reports you want them to giving them the authority and the reason to stay for an extended period of time.

Exceptionally Practical Guard Tour Client Web Portal

All a client wants is easy access to all the critical information concerning his property. With that in mind, our guard tour Client Web Portal is designed to always keep them in the loop.

The clients can easily access consolidated daily activity reports as well as every single report separately. They can also access post orders, live tracker and visitor manager data, view schedules and request them by securely logging into the portal with their username and password.

What More Does Guard Tour Client Web Portal Offer?

Access visitor and vehicle details to keep track of who visits the post sites and when.

Stay updated on how patrols are executed on the site with guards' GPS tracking history.

Clients can decide how they want to be notified about events with system notifications settings.
