

GUARDSPRO

Breakthrough GuardsPro Mobile Patrol App

GuardsPro Mobile App is designed to streamline communication between security managers and security guards on the ground.

The app works seamlessly on Android and iOS to facilitate them to work together to improve performance and address accountability issues. The app can be used for GPS tracking, submitting online reports, conducting site check-in/outs, messaging and much more.

The GuardsPro Mobile App allows the security guards to be more productive while on patrol. The result is higher accountability and performance standards.

What Can I Do With GuardsPro Mobile App

In-App Check-In/Out

Give your security guards the convenience of checking in/out of post sites in a single click while the security manager gets notified in real-time.

Online Reporting

Reporting made convenient for security guards by allowing them to submit reports with multimedia files attached from the GuardsPro mobile app.

Passdowns Logs

Create passdown logs to share important information with other officers assigned to the post site especially in case of shift changes.

Live Tracking

Want to get a clear view of the security guard workforce? GPS tracking enables you to accurately track your guards while they are logged in via mobile app.

View Tasks

Access and complete tasks assigned by the security manager right from the GuardsPro Mobile App when checked in to the post site.

Manage Dispatch Calls

Access dispatch calls assigned by the guard tour dispatcher and update the status right from the app to ensure a rapid incident response.

Access Schedules

Access shifts and changes therein on-the-go in real-time on the GuardsPro Mobile App. Confirm schedules and open shifts in a single click.

In-App Notifications

Get critical updates on the go. In-app notifications keep guards updated of schedule changes, assigned tasks, post orders, open shifts, and more.

Swap Shift

Allow guards to exchange their assigned shifts with other security guards, admin can manually or automatically approve/reject requests.

Request Time Off

Apply for full/partial day or paid/unpaid leaves right from the GuardsPro Mobile App and get updates about the request status in real-time.

Panic Button

Lets guards alert the admin in real-time about any emergency on the post site pressing the panic button on the GuardsPro Mobile App.

Site Tours

Scan QR and NFC tags right from the GuardsPro Mobile App and start & complete site tours improving schedule compliance and on-site performance.
