GuardsPro Security Guard Live Tracker: Monitoring On-Site Movements In Real-Time

Allow the security manager to monitor the movement of security guards on sites in real-time when logged into the app ensuring negligible deviations.

Guard Tracking System Encourages Transparent Client-Customer Relationship

Put an end to the client's complaints. Allow them to transparently view reports and track the history of an entire day to enhance the client-customer relationship.
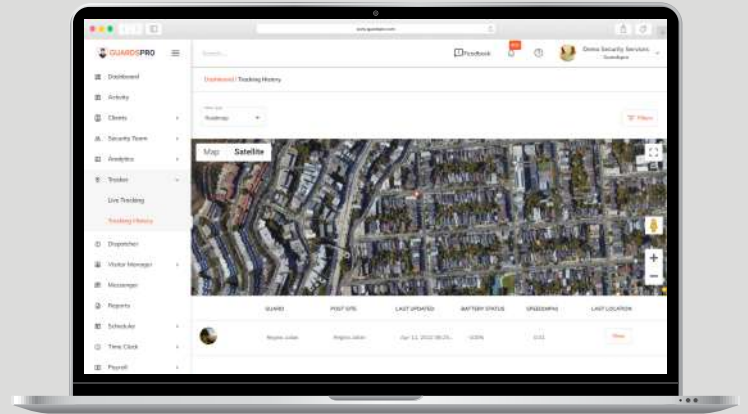

GUARDSPRO

GuardsPro: The
Guard Tracking System

Ensuring Safety First

Stay updated with accurate GPS data on the go. Let your guards know you care.

Enhanced Field Visibility

Track the movements of your security guards simultaneously on different sites, with accurate GPS data on the go.

Improved Security Guard Safety

Real-time updates in the form of photos, videos, and reports will ensure keeping you updated with every little detail of the security guards in action on-site.

What's More **In It For You?**

Establishes Accountability

Increasing field visibility encourages the guards to commit to their work, show up on time, and decrease the chances of flouting patrols.

Reinforced Schedule Compliance

Get notified in real-time of geofence-based check-in/out to gain full control over the guard's movements to ensure schedule compliance.

Geo-Fencing

Build virtual perimeters to mark the authorized areas on the post site and be informed of violations keeping the guards safe and compliant with the area accessibility as defined by the client.

Manage Remote Site Security Guards Easily

To meet the industry's security standards, GuardsPro's live tracker and watch mode help to keep the security guards safe working at remote sites.
