GuardsPro: The Most Powerful Security Guard Scheduler

Automate Your Security Guard Scheduling Process.

GuardsPro Scheduler is built to simplify how you schedule and communicate with your security team on-field. It is feature-loaded, yet simple to use. Here is what you can do with it.

Shift Templates

Create and use shift templates across multiple post sites. Save your time and money while you share the schedule with your security guards on-the-go.

Publish/Unpublished Shifts

Share the right information about the shift changes in time with GuardsPro publish/unpublish feature.

Open Shifts

Open shift feature allows you to let your security guards choose which shifts they want to work, giving them the needed extra flexibility.

Shift Status

Reduce any scope of conflict by simply letting your security guards to confirm their shifts using GuardsPro's security patrol app and to ensure schedule compliance.

Live Notifications

Get multiple live notifications right within the dashboard or inbox. Find out when your guards confirm shifts, clock in/out, pick up open shifts and more.

Attendance Overview

Easily find out when and at what time your guards are clocking in, also if they are arriving on time at post site. Get live notifications when guards are late.

Check Missed Patrols

Make sure the scheduled patrol is performed and every site is visited with the clocking system for security guards. Get an instant notification if the guard misses patrols.

Overtime Control

Take control of your wage liabilities with the ability to schedule guards based on pay rate, skill sets, regular, and overtime hours.

Skill Set Scheduling

Assign skills to guards and schedule as per the skill sets based on the specific requirements of the post sites and clients.

Swap Shift

Allow guards to exchange their assigned shifts with other security guards. Admin can manually or automatically approve/reject requests.

Time Off

Manage full/partial day, paid/unpaid leave requests made by the guards through the GuardsPro mobile app right on the dashboard.

Bulk Attendance Reconciliation

Eliminate the time consumed by the admin to manually reconcile attendance of every guard clocking-in late or early on a post-site by setting a threshold.

Accurate, Yet Flexible.

Encourage autonomy and leadership with a flexible scheduling process. GuardsPro scheduler works to boost guard engagement and ensure 100% performance every time.
